

FINDING HIV TREATMENT IS ~~IM~~POSSIBLE

**Treatment is available and accessible
regardless of your insurance
and immigration status.**

Don't Wait for Symptoms!

Start taking HIV medicines as soon as possible after your HIV diagnosis so you can reduce the amount of virus in your body.

Pills or Shots?

Choose the treatment that suits you best: one pill every day, or a long-acting injection every month, every two months, or every six months.

Treatment Works!

If you start and keep on with your treatment and doctor appointments, you'll stay healthy, stop HIV transmission, and live a long, wholesome life.

Start Treatment. Stick to It. Get better.
